Larry and Eugene,

I hope that you both are doing well. Since our meeting last September, we have been very busy working up our responses to your inquiries and gathering the data necessary to help you complete your review of our project in American Samoa. We have also been corresponding frequently with the EPA Region 9 Office of Enforcement as they have worked in determining our project's status as a "Small Power Production Facility". It was our hope that a favorable determination would grant the project exemption from NSPS AAAA and EEEE.

I am happy to report that the Office of Enforcement rendered the decision that the ETP project in American Samoa is, in fact, a qualifying Small Power Production Facility, and, as such, should be exempted from 40 CFR Part 60 Subpart AAAA and Subpart EEEE. It's quite possible that you guys have already been notified of this, but if not, I have attached the letter of determination to this email.

We feel as if this is a very big step in the permitting of this project, and on the heels of this decision, wanted to immediately follow up with the information that you have requested. To this end, I have included a guiding document (ETP FWTF Preapplication Items 2017-01-18.pdf) with this email that addresses your most recent outstanding questions, and also references other attached files that should round out the data that you have asked for.

If you have any questions at all, or if there's anything that has been left out, please let me know. We are very excited as we move this project ahead, and are looking forward to speaking with you again soon.

Best regards,
Kevin

Kevin M. Moore
